

HYEONMIN JEON

hyeonmin16@yonsei.ac.kr Seoul, Korea Financial Investment AI Lab, Yonsei University

Applying to Ph.D. programs in IE / OR, Fall 2027

EDUCATION

Yonsei University, Department of Industrial Engineering Seoul, Korea
M.S. in Industrial Engineering — Financial Investment AI Lab, advisor Prof. Kyong Joo Oh Mar 2025 – Feb 2027 (expected)

- GPA 3.97 / 4.0 (letter-grade basis)
- Relevant coursework (all A range): Stochastic Modelling Theory, Probabilistic Models & Bayesian Inference, Time-Series Analysis, Deep Learning Theory & Applications, Advanced Investment Engineering, Financial Engineering Topics, Corporate Finance

Chung-Ang University, School of Electrical and Electronics Engineering Seoul, Korea
B.S. in Electrical and Electronics Engineering Mar 2019 – Feb 2025

- GPA 3.59 / 4.0 (letter-grade basis) · Graduation thesis: *Light-weighting Tiny YOLOv3: The Impact of Quantization on Real-World Applications* (advisor Prof. Minhyeok Lee)
- Relevant coursework (all A or A+): Linear Algebra, Mathematics for Electrical Engineering, Numerical Analysis, Random Variables, Signals & Systems, Machine Learning, Artificial Intelligence, Algorithms

RESEARCH INTERESTS

Simulation optimisation and ranking & selection under stochastic constraints and input uncertainty; generative models (diffusion, normalizing flows) as simulation input models; sequential decision policies with statistical guarantees in finance and operations.

RESEARCH EXPERIENCE

Financial Investment AI Lab, Yonsei University Seoul, Korea
Graduate Research Assistant Mar 2025 – Present

- Designed a conditional diffusion transformer for multi-asset scenario generation and audited its risk statements against nine portfolio books over 139 decision dates (first-author manuscript, under review at *Expert Systems with Applications*).
- Built a phase-preserving measurement of cross-sectional repricing timing from predicted wavelet scalograms; out-of-sample rank IC +0.074 where magnitude read-outs are flat (first-author manuscript, reviews completed at *ESWA*).
- Treated the prior in Bayesian factor selection as a learned surrogate: a normalizing flow fit to the mixture-of-g reference reproduces the exact posterior over models (TV 0.016), and the cost of a density-free (GAN) surrogate is measured in posterior error and understated model uncertainty (working paper).
- Implemented and verified ranking-and-selection procedures (KN, feasibility determination, recycled observations, CRN) and measured how a fitted input model erodes the probability-of-correct-selection guarantee.
- Co-authored lab manuscripts on deep convolutional factor models with explainable AI (2nd author) and RL-based enhanced indexing (3rd author).

TIPS R&D Project with Urban Complex (lab project)

Seoul, Korea

Researcher — artist-style generative engine

Apr 2024 – Aug 2026

- Compared three vision-language captioners for artistic style and built a structured captioning pipeline; trained a QLoRA style classifier on Qwen2-VL-7B (91.4 % seen / 76.0 % unseen; 96.0 % fused with a DINOv2 prior).
- Moved StyleCrafter generation from VideoCrafter to SDXL, added domain checkpoints routed by the classifier's verdict, and specified the service API, evaluation dashboard and 3D (STL) output path. With J. Jeon and D. H. You.

GAIL (AI Lab), School of EEE, Chung-Ang University

Seoul, Korea

Undergraduate Researcher

Dec 2022 – Dec 2024

- Diffusion-model oversampling for imbalanced fraud data (KICS Fall Conference 2023); latent-diffusion portfolio study; lifelog sleep-score prediction (ETRI challenge); 3D point-cloud classification.

Carbon-Neutral ESG Practical-Problem Research Group, Chung-Ang University

Seoul, Korea

Team Lead, "Green-Navi" (Green AI track)

Apr 2023 – Dec 2023

- Reinforcement learning for fuel-optimal urban routing in AIMSUN; presented at the research fair (Nov 2023). MSIT / NRF Field-Linked Future-Leading Talent programme.

PUBLICATIONS & PRESENTATIONS

SUBMITTED TO JOURNALS

1. **H. M. Jeon**, H. S. Lee*, K. J. Oh*. Conditional Diffusion Transformers for Multi-Asset Scenario Generation and Portfolio Risk Measurement. *Expert Systems with Applications* · ESWA-D-26-39029. Under review, 2026.09.
2. **H. M. Jeon**, H. S. Lee*, K. J. Oh*. FinPhasor: Phase-Preserving Measurement of Cross-Sectional Timing in Equity Markets. *Expert Systems with Applications* · ESWA-D-26-35395. Required Reviews Completed, 2026.09.
3. S. H. Kim, **H. M. Jeon**, D. H. You, J. Jeon, S. Baek, H. S. Lee, K. J. Oh*. Deep Convolutional Factor Prediction with Explainable AI for Enhanced Investment Strategy. *Applied Soft Computing* · previously *Expert Systems with Applications* · next venue pending. Pending resubmission, 2026.09.
4. D. H. You, J. Jeon, **H. M. Jeon**, S. H. Kim, S. H. Yoo, T. Y. Kim, H. S. Lee, K. J. Oh*. Benchmark-Aware Enhanced Indexing Guided by the Volume–Price Index. *JCIS* · previously *Expert Systems with Applications* (ESWA-D-25-33272) · next venue pending. Pending resubmission, 2025.12.

CONFERENCE PRESENTATIONS AND COMPETITION SUBMISSIONS

5. Y. Jeong*, H. Kim, D. H. You, **H. M. Jeon**, A. de Castro, T. Lee. A Study for Forecasting Solar Energy Power Generation. *45th International Symposium on Forecasting (ISF 2025)*, Beijing, Jul 2025. Talk; with SAS Institute.
6. **H. M. Jeon**, M. Lee. Dealing with the Imbalanced-Data Problem with a Diffusion Model. *KICS Fall Conference*, Nov 2023.
7. **H. M. Jeon** et al. Personalized Sleep Score Prediction Model Using a Lifelog Dataset. Submitted to the *ETRI Human Understanding AI Paper Challenge*, 2024.

ONGOING RESEARCH

8. **H. M. Jeon**. Learned Surrogate Priors for Bayesian Model Selection: Density, Uncertainty, and the Cost of a Sampler. Working paper; lab seminar, Jan 2026.
9. **H. M. Jeon**. Bayesian Capacity Sizing for an Exchange Matching Queue under Over-Dispersed Arrivals. Working paper, 2026.

TEACHING

Graduate Program in AI Investment Engineering (AI인베스트먼트협동과정, contract-based graduate program), Yonsei University <i>Teaching Assistant</i>	Seoul, Korea Sep 2025 – Present
Financial Engineering (undergraduate), Department of Industrial Engineering, Yonsei University <i>Teaching Assistant</i>	Seoul, Korea Spring 2026

SELECTED PROJECTS

Retina Exam Room Scheduling , with Nune Eye Hospital	Feb 2026 – Present
Recalibrated a discrete-event simulator to the hospital's records; rule, behaviour-cloned and PPO policies on a 44-day fair replay (time in room 12.2 → 8.2 min); read-only EMR integration and live comparison (wait between exams 2.73 → 1.14 min).	
Research-Agent Platform	Sep 2026 – Present
LLM agents that verify papers, replicate numbers and draft referee reports against a journal baseline; referee committees, review ledger, MCP server (Next.js, SQLite, Anthropic SDK).	
Simulation-methodology reimplementations — rs-lab, Input-Uncertainty Select, TailFlow, roughvol-lab, Eco-Route RL, Splat from Scratch	Sep 2026
Ranking & selection with verified guarantees; input-uncertainty effects on selection; conditional diffusion as a risk engine; rough volatility; CO₂-optimal routing on SUMO with P(correct selection) 0.956; 3D Gaussian splatting in plain PyTorch.	
Light-weighting Tiny YOLOv3 — graduation thesis, Chung-Ang University	2024
Int8 quantization with layer fusion; weights 1.6 GB → 100 MB, inference 22–64 % faster across five devices, mAP –2.78 pt on PASCAL VOC. Team of three.	
fai.yonsei.ac.kr — the lab's website	Jul 2025
Built and maintain the Financial Investment AI Lab's website (React, Vite).	

HONORS & AWARDS

Special Prize (data use) , Chungcheong ICT Innovation public-data competition — GIS and K-water data on regional waste management	2024
DB Financial Economics paper competition — a national-pension financial-product proposal (with H. Kim)	2024

SKILLS

PROGRAMMING	Python (NumPy, SciPy, pandas, PyTorch, CUDA) C++ MATLAB TypeScript / Next.js SQL LaTeX Linux multi-GPU servers
METHODS	Discrete-event & Monte Carlo simulation Ranking & selection Variance reduction Diffusion & flow models Reinforcement learning Behaviour cloning Bayesian inference Time-series analysis
TOOLS	Eclipse SUMO AIMSUN SAS Hugging Face Electron PostgreSQL / SQLite
LANGUAGES	Korean (native) English (working proficiency; TOEFL in preparation)
